

Shelton Sustainable Equity Strategy

The Approach

This strategy seeks to achieve long-term capital appreciation by investing in stocks in the sustainable economy. The portfolio management team pairs a macro-economic growth thesis based on scientific, demographic, and climate trends with bottom up research. The team identifies green economy companies as those which fulfill one or more of the requirements of our PRIME criteria.

PRIME Criteria

Investment Philosophy

Fundamental Research & Analysis

- Focus on strong free cash flow and attractive return on invested capital (ROIC)
- Low valuation and therefore mispriced by capital markets
- Business models that embrace sustainability/ ESG performance as a competitive advantage in operations
- Demonstrable meaningful contribution to industrial transformation

Rigorous Quantitative Portfolio Construction & Risk Management

- Use of quantitative tools to identify companies and construct portfolios
- Use of risk controls to dampen volatility and express portfolios mandate
- Assess rebalance of weightings on a quarterly basis

Impact Measurement & Reporting

- Map holdings to sustainable development goals and other "sustainability" frameworks
- Produce quarterly newsletter
- Engage with companies on industrial transformation progress
- Join other coalitions of shareholder activists in company campaigns and engagements.

IMPORTANT INFORMATION

ESG Risk: The Sustainable Equity Strategy's consideration of ESG factors as part of its investment strategy may limit the types and number of investment opportunities available to the strategy, as a result, the strategy may underperform other strategies that do not consider ESG factors. The strategy's consideration of ESG factors may result in the strategy investing in securities or industry sectors that underperform the market as a whole, or forgoing opportunities to invest in securities that might otherwise be advantageous to buy.

INVESTMENTS ARE NOT FDIC INSURED AND MAY LOSE VALUE.
