Total returns include changes in share price and the reinvestment of income dividends and all capital gains distributions. All performance figures reflect an expense reimbursement, where applicable. Without the expense reimbursement, the performance figures would be lower. Performance figures represent past performance and are not a guarantee of future results. The investment return and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost; current performance may be lower or higher than the performance data quoted.
